DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, 18, and 19, drawn to a machine for vending floral arrangements with stacked carousels, classified in class 47, subclass 41.01.
- II. Claims 13-17, drawn to a machine for vending floral arrangements with a viewing window and light source, classified in class 47, subclass 17.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has a window in either the front or the back of the machine and a light source which has separate utility such as a greenhouse. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

A telephone call was made to David Metzger on 06 December 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
